ABSTRACT

This document presents statistical data on South Dakota and its 176 school districts for the 1998-99 school year. In 1998-99, South Dakota had 757 public schools serving 129,709 students. About half of the schools enrolled 100 or fewer students, and about one-quarter of school districts served fewer than 200 students. Minority group enrollment was about 12.3 percent, including 9.5 percent American Indian. Section 1 summarizes state data and covers: number of districts and schools; 1998 fall enrollment; program indicators for early childhood programs, home schooling, alternative schools, vocational and technical education, general educational development (GED), adult basic education, birth to age 3 services, special education, and nutrition services; student achievement (graduation rate and scores on college entrance examinations and standardized achievement tests); dropouts; administrator and teacher characteristics and salaries; and financial data. Sections 2 and 3 summarize district and school data and present profiles for individual districts. Each profile includes details on area and location, enrollment and attendance, percent eligible for free or reduced lunch, students transported, revenues, state aid, taxable valuations, levies, expenditures, instructional staff, and individual school data. Section 4 contains state data tables on staff, district rankings, expenditures, revenues, state aid, and changes in fund balances. Section 5 is a glossary. (SV)

South Dakota

Here is the 1998-99 edition of "Education in South Dakota: A Statistical Profile." The publication is an indispensable source of information about education in South Dakota. This document is produced by the South Dakota Department of Education & Cultural Affairs.

The information is also available online via the department's website at <http://www.state.sd.us/deca/>. As additional information becomes available those facts are added to the web site.

South Dakota schools are online to every K-12 public classroom in South Dakota. The state's wide area network, Digital Dakota, will become an even more important part of our future. This document and the web site will offer valuable information for everyone.

Many parties express interest in more and better information about schools and the state's K-12 education system. The department continues to enhance the contents of this document--and the companion website--to meet the needs that are evident.

It is the department's sincere hope that the information contained within this document will be valuable data that we can use to help our youth become better educated and contributing citizens of South Dakota.

Sincerely,

Ray

Ray Christensen, Secretary
South Dakota Department of Education & Cultural Affairs

EARLY CHILDHOOD PROGRAMS

Many policymakers believe that educational efforts targeting disadvantaged children before they begin their traditional schooling will improve their chances of success in the K-12 system. Consequently, the federal government has expanded the Head Start and Even Start programs over the past five years. Head Start is a program which provides instruction to pre-school aged children from economically disadvantaged backgrounds. Even Start serves a similar population, but targets parents with low levels of literacy and seeks to educate not just the children, but parents and children. The data below cover public school, federally funded, and non-public programs.

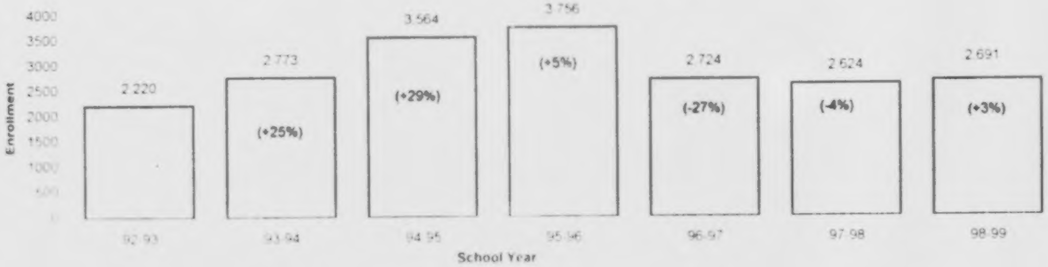
Alternative Instruction Enrollment: 1992-99



THE TYPICAL STUDENT OF ALTERNATIVE INSTRUCTION:

Keeping in mind the doubled chance for self selection to influence the results of survey research, one can still try to construct a rough profile of alternative instruction families. While there is variation among surveys, certain characteristics seem to be emerging. Compared to the general population, alternative instruction families seem to be more religious, more conservative, white, somewhat more affluent and with somewhat more years of education, and more likely to be a two parent family. There are usually two children of school age who are receiving alternative instruction, and a third usually younger, in the family. Typically, the mother takes the largest share of the teaching responsibility, but the father participates. In some families fathers are the major player in the alternative instruction activities.

ALTERNATIVE INSTRUCTION SUMMARY:

Alternative instruction (homeschooling) is a small but rapidly growing practice in which parents design and implement educational programs for school-aged children. The activity replaces full-time, in-school programs and is used to satisfy state compulsory education requirements. It takes place primarily in a family setting or in a nearby community. Normally parents plan and implement the learning program, although sometimes they may find a tutor and sometimes older children may organize their own independent study. It may be structured or unstructured, it may be affiliated with a public or private school in some way, it may involve shared lessons with other alternative instruction families. Although usually based at home, it often extends beyond the home. Alternative instruction families visit libraries, museums, factories, homes for the aged, churches, and, in some cases, they attend classes. Some attend public and/or private school, a community school or some other special program for one or more sessions each week.

ALTERNATIVE PROGRAMS

Alternative education describes a variety of schooling and programmatic options for "youth at risk" who do not meet codified norms of behavior or academic success in mainstream settings. Each program differs according to their mission. Alternative education programs are a necessary and vital way to recognize that all youth are individuals with different learning styles, preferences, and needs.

In the 1998-99 school year there were 27 alternative programs throughout the state. Some are funded by federal, state and local matching grants. Eighteen programs were funded through the federal Job Training Partnership Act (JTPA), 12 of which were also funded through the state's Youth at Risk appropriation. Both grants were matched by local districts. Alternative programs provide a second chance for students who have dropped out of the traditional K-12 system. With the exception of the first enrollment table, all data below represents only the federally funded alternative programs.

GENERAL EDUCATIONAL DEVELOPMENT (GED) SERVICES

Created in 1942 as a service to World War II veterans, the GED provides those who did not complete high school with the opportunity to receive the equivalent of a high school diploma. The GED is administered by the GED Testing Service. The costs of the test are covered by fees paid by the test taker. The test consists of five tests which measure general knowledge and skill development in writing, social studies, science, math, literature and the arts. The minimum age requirement to take the GED in South Dakota is 16. Scored on a scale of 20-80, South Dakota requires a minimum score of 40 per test section and a total average of 45.

SPECIAL EDUCATION

The provisions of South Dakota Codified Law 13-37-1 define children in need of special education and special education related services as any person under the age of 21 who is a resident of the state of South Dakota and who because of his/her educational needs is not adequately provided for through the usual facilities and services of the school. The Administrative Rules of South Dakota, Article 24:05, provide the rules governing special education programs for public and nonpublic schools. The data below are taken from Special Education's Child Count, which looks at annual enrollment in Special Education on December first.

STANFORD 9 ACHIEVEMENT TEST

The Stanford Achievement Test Series, Ninth Edition is an overall measure of achievement in the basic skills area. The Otis-Lennon School Ability Test (OLSAT), Seventh Edition is a measure of abstract thinking and reasoning ability, measuring the same abilities that are emphasized in school and that are related to success in school learning. Ability scores and achievement scores should ideally be similar. Only Grades 4 and 8 take the OLSAT. All scores are percentile ranks, which indicate the performance of a typical South Dakota student relative to student performance nationally.

NATIONAL MERIT SCHOLARS QUALIFYING TEST (NMSQT) / PRELIMINARY SAT (PSAT)

The National Merit Scholarship program provides students the opportunity to take the Preliminary SAT, or PSAT, during or prior to their junior year in high school. Graded on a scale of 20-80, the PSAT tests students' math, verbal and writing skills. Each state is given an allocation of students to qualify as semifinalists based on the state's percentage of the national total of high school graduating seniors. In South Dakota, approximately 50 students with the highest scores become semifinalists. Finalists are then chosen out of this pool, again with a representative allocation chosen from each state. In South Dakota, approximately 40 students are annually chosen as finalists.

FACT SUMMARY:

◆ Expenditures in FY99 have been impacted by changes made to the accounting chart of accounts (i.e., tuition was previously reported as a "non-programmed" expenditures but is now included in total instructional expenditures).

◆ The annual percent increase in special education expenditures is almost 6%, general fund expenditures increased by 4.64%.

◆ Salaries and benefits represent almost 80% of the school districts expenditures in the general and special education funds.

◆ In the past ten years the total statewide general fund expenditures have increased by 51%; special education expenditures have increased by 91%. Based on fall enrollment the number of students increased by only 3% when comparing fall 1988 to fall 1998 figures.
